

MUHAMMAD WASIQ TANVEER

Full-Stack Developer · Automation Engineer · AI Integrations

[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | mwasqit@gmail.com | +92 343 9177677 | Kohat, KPK, Pakistan

Education

Kohat University of Science & Technology (KUST)

BSc Computer Science | CGPA: 3.98 / 4.00 | Class Representative

Focus on Full-Stack Development, AI Engineering, Dev Ops.

Kohat, KPK

2023 – 2027

Skills

Languages: JavaScript, Python, Java, C, C++, SQL

Frameworks & Tools: React, Node.js, Express, MySQL, Chrome Extensions API, Git, VS Code

AI & Automation: Anthropic API, OpenAI API, DeepSeek API, Keepa API, Prompt Engineering, GitHub Actions

Concepts: REST API Design, Database Design, DSA, OOP, Browser Extension Development

Professional Experience

Ads Acceleration

Remote

Automation Engineer — Sole Developer

March 2026 – Present

- Designed and built the entire adsacceleration.com platform from scratch — React frontend, Node.js/Express backend, MySQL database — as the only engineer.
- Built 15+ Amazon seller tools: SQP Analyzer, Keyword Cannibalization Analyzer, PPC Impact Visualizer, Negative Keyword Hunter, Keepa ASIN Comparator, and AI-powered Listing Comparator.
- Developed two Chrome Extensions that inject live dashboards and real-time data directly into Amazon Seller Central — eliminating manual data exports for clients.
- Automated daily BSR reporting via Keepa API + GitHub Actions cron jobs, pushing data to client Google Sheets and Slack channels with zero manual effort.
- Unified AI provider access (Anthropic, OpenAI, DeepSeek) through a single Node.js endpoint reused across all platform tools and extensions.

Brandora

On-Site

Frontend Web Developer Intern

June 2025 – Jan 2026

- Built and shipped the CR Attendance App — a solution to a real problem (messy WhatsApp-based attendance tracking) that scaled to other class representatives after launch.
- Developed responsive web apps using React, JavaScript, and Node.js; contributed to open-source projects during Hacktoberfest.

Projects

Ads Acceleration Platform

2026 – Present

Full-Stack Web App · React, Node.js, Python, MySQL, Multi-AI Integration

- End-to-end internal platform for an Amazon PPC agency — 8+ tools covering keyword intelligence, PPC reporting, BSR tracking, and AI-powered listing optimization.
- Single unified AI backend (DeepSeek / Anthropic / OpenAI) shared across all tools and Chrome extensions, keeping integration overhead minimal.

Amazon SQP Intelligence Extension

2026

Chrome Extension · Chrome Extensions API, JavaScript

- Injects an all-in-one Search Query Performance dashboard directly into Amazon Seller Central — keyword trends, brand analytics, and performance data in one place without leaving the console.

Amazon Console Real-Time Data Extension

2026

Chrome Extension · Chrome Extensions API, JavaScript

- Intercepts Amazon Seller Central network requests and injects live, processed results directly into the page — sellers see actionable insights inline with no manual exports.

Keepa BSR Tracker & Auto-Reporter

2026

Automation Pipeline · Python, Keepa API, GitHub Actions, Google Sheets, Slack

- Scheduled daily BSR tracking pipeline — Keepa API data processed via Python, pushed automatically to client Google Sheets and Slack channels via GitHub Actions cron.
- Clients receive their daily product data proactively with zero manual intervention on either side.

CR Attendance App

2025 – Present

Full-Stack Web App · React, Framer Motion, postgres SQL, SupaBase · Live at crattendanceapp.vercel.app

- Replaced messy WhatsApp-based attendance tracking for class representatives — take attendance on the go, organize it cleanly, and share with teachers in seconds.
- Built to solve a personal problem; scaled to other CRs after launch.

Paper Vault

2026 – Present

Full-Stack Web App · React, Framer Motion, postgres SQL, SupaBase · Live at paper-vault-ivory.vercel.app

- Student-built platform for students: upload past exam paper photos to a shared vault so others can find and study from them without depending on seniors.

Achievements & Activities

- Winner — University Quiz Competition
- Representative — PEAK Inter-School Debate Competition
- Hacktoberfest Open-Source Contributor
- PM Laptop Scheme 4.0 Recipient — awarded a government laptop for academic merit
